FAQs:

- I used an at-home test kit and tested positive; where should I report these results? – The results are not reportable to the town, and would not be included in these case counts.
- Should I have an additional test done if my home test is positive? – Yes, we recommend seeking a PCR test to confirm the home test.
- Should I be vaccinated? People who are vaccinated are still getting Covid-19 – Yes, vaccination has been shown to decrease adverse events when someone does acquire the virus.
- Should I wear a mask? People are still getting Covid-19 when they wear a mask. – Masks are an important intervention to help slow the spread of the virus, and can be used when indoors in public spaces such as retail stores and gyms for added protection. Not all masks are equal; reusable cloth masks are OK, disposable procedure masks are better, and N95-type masks are the best protection.

Items to Note:

- These numbers represent the data obtained through the state’s MAVEN system, and do not reflect diagnosis through home rapid tests; assume that the actual positive cases are higher.
- Of the 29 persons testing positive from 3/21/2022 to 3/23/2022, only 5 are under the age of 21 years. There is a possibility that this spike could be related to the St. Patrick Holiday.
- 25 of the 66 cases (38%) in this 2 week review are from 11 households.
- 81% of Andover residents are fully vaccinated; 51% have received a booster shot.
- 3 cases out of the 66 cases in this two week period are under 5 years old, and therefore ineligible for vaccine.
