The most recent surge appears to have peaked, and we are hopeful that this signals a decrease in cases for the summer:

- With the proliferation of use of in-home antigen tests, there are many more cases than those reported here – we report only lab-confirmed cases through the state system.
- Covid-19 treatments are widely available at this time; contact your physician or the state (see link above).
- We remind all that we are in a very different place now than we were 6 months ago. The virus has been less debilitating, our vaccination rates have increased, and there are effective treatments available, allowing most cases to recover with little in the way of complications.
- Residents should watch these numbers and make their own decisions concerning mask use. **However**, if you have tested positive for Covid-19, or are a close contact to a positive case, you should mask in accordance with state guidelines (see the link above).

Qualifications: WE KNOW THAT SOME OF THESE NUMBERS CONFLICT WITH EACH OTHER; THIS IS MEANT TO SERVE AS A LENS TO WHAT IS OCCURRING IN THE COMMUNITY. This data is fluid and may not match numbers presented in the state’s weekly community data. The state positive case data may be found here: <https://www.mass.gov/info-details/covid-19-response-reporting>.

- In the 16 to 19 year range, there are more persons vaccinated than listed in the population. Population numbers are estimates created by the Commonwealth; the number vaccinated is taken from immunization reports.
- State-wide vaccination data can be found here: <https://www.mass.gov/info-details/massachusetts-covid-19-vaccination-data-and-updates>
