- With the proliferation of use of in-home antigen tests, there are many more cases than those reported here – we report only lab-confirmed cases through the state system.
- Covid-19 treatments are widely available at this time; contact your physician or the state (see link above).
- We remind all that we are in a very different place now than we were 6 months ago. The virus has been less debilitating, our vaccination rates have increased, and there are effective treatments available, allowing most cases to recover with little in the way of complications.
- Residents should watch these numbers and make their own decisions concerning mask use. **However**, if you have tested positive for Covid-19, or are a close contact to a positive case, you should mask in accordance with state guidelines (see the link above).
- Vaccines are now available for children age 6 months to 5 years of age. Contact your child's health care provider or visit [COVID-19 Vaccine Availability | Mass.gov](#) to make an appointment.
