f. Additional Plan or Document Title

B. Findings

1. Findings pursuant to the Massachusetts Wetlands Protection Act:

Following the review of the above-referenced Notice of Intent and based on the information provided in this application and presented at the public hearing, this Commission finds that the areas in which work is proposed is significant to the following interests of the Wetlands Protection Act (the Act). Check all that apply:

- a. Public Water Supply
- b. Land Containing Shellfish
- c. Prevention of Pollution
- d. Private Water Supply
- e. Fisheries
- f. Protection of Wildlife Habitat
- g. Groundwater Supply
- h. Storm Damage Prevention
- i. Flood Control

2. This Commission hereby finds the project, as proposed, is: (check one of the following boxes)

Approved subject to:

- a. the following conditions which are necessary in accordance with the performance standards set forth in the wetlands regulations. This Commission orders that all work shall be performed in accordance with the Notice of Intent referenced above, the following General Conditions, and any other special conditions attached to this Order. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, these conditions shall control.

B. Findings (cont.)

Denied because:

- b. the proposed work cannot be conditioned to meet the performance standards set forth in the wetland regulations. Therefore, work on this project may not go forward unless and until a new Notice of Intent is submitted which provides measures which are adequate to protect the interests of the Act, and a final Order of Conditions is issued. **A description of the performance standards which the proposed work cannot meet is attached to this Order.**
- c. the information submitted by the applicant is not sufficient to describe the site, the work, or the effect of the work on the interests identified in the Wetlands Protection Act. Therefore, work on this project may not go forward unless and until a revised Notice of Intent is submitted which provides sufficient information and includes measures which are adequate to protect the Act's interests, and a final Order of Conditions is issued. **A description of the specific information which is lacking and why it is necessary is attached to this Order as per 310 CMR 10.05(6)(c).**
- 3. Buffer Zone Impacts: Shortest distance between limit of project disturbance and the wetland resource area specified in 310 CMR 10.02(1)(a) 0

C. General Conditions Under Massachusetts Wetlands Protection Act

The following conditions are only applicable to Approved projects.

1. Failure to comply with all conditions stated herein, and with all related statutes and other regulatory measures, shall be deemed cause to revoke or modify this Order.
2. The Order does not grant any property rights or any exclusive privileges; it does not authorize any injury to private property or invasion of private rights.
3. This Order does not relieve the permittee or any other person of the necessity of complying with all other applicable federal, state, or local statutes, ordinances, bylaws, or regulations.
4. The work authorized hereunder shall be completed within three years from the date of this Order unless either of the following apply:
 - a. The work is a maintenance dredging project as provided for in the Act; or
 - b. The time for completion has been extended to a specified date more than three years, but less than five years, from the date of issuance. If this Order is intended to be valid for more than three years, the extension date and the special circumstances warranting the extended time period are set forth as a special condition in this Order.
 - c. If the work is for a Test Project, this Order of Conditions shall be valid for no more than one year.
5. This Order may be extended by the issuing authority for one or more periods of up to three years each upon application to the issuing authority at least 30 days prior to the expiration date of the Order. An Order of Conditions for a Test Project may be extended for one additional year only upon written application by the applicant, subject to the provisions of 310 CMR 10.05(11)(f).
6. If this Order constitutes an Amended Order of Conditions, this Amended Order of Conditions does not extend the issuance date of the original Final Order of Conditions and the Order will expire on _____ unless extended in writing by the Department.
7. Any fill used in connection with this project shall be clean fill. Any fill shall contain no trash, refuse, rubbish, or debris, including but not limited to lumber, bricks, plaster, wire, lath, paper, cardboard, pipe, tires, ashes, refrigerators, motor vehicles, or parts of any of the foregoing.

C. General Conditions Under Massachusetts Wetlands Protection Act

8. This Order is not final until all administrative appeal periods from this Order have elapsed, or if such an appeal has been taken, until all proceedings before the Department have been completed.
9. No work shall be undertaken until the Order has become final and then has been recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land upon which the proposed work is to be done. In the case of the registered land, the Final Order shall also be noted on the Land Court Certificate of Title of the owner of the land upon which the proposed work is done. The recording information shall be submitted to the Conservation Commission on the form at the end of this Order, which form must be stamped by the Registry of Deeds, prior to the commencement of work.
10. A sign shall be displayed at the site not less than two square feet or more than three square feet in size bearing the words,

"Massachusetts Department of Environmental Protection" [or, "MassDEP"]
"File Number 090-1247 "
11. Where the Department of Environmental Protection is requested to issue a Superseding Order, the Conservation Commission shall be a party to all agency proceedings and hearings before MassDEP.
12. Upon completion of the work described herein, the applicant shall submit a Request for Certificate of Compliance (WPA Form 8A) to the Conservation Commission.
13. The work shall conform to the plans and special conditions referenced in this order.
14. Any change to the plans identified in Condition #13 above shall require the applicant to inquire of the Conservation Commission in writing whether the change is significant enough to require the filing of a new Notice of Intent.
15. The Agent or members of the Conservation Commission and the Department of Environmental Protection shall have the right to enter and inspect the area subject to this Order at reasonable hours to evaluate compliance with the conditions stated in this Order, and may require the submittal of any data deemed necessary by the Conservation Commission or Department for that evaluation.
16. This Order of Conditions shall apply to any successor in interest or successor in control of the property subject to this Order and to any contractor or other person performing work conditioned by this Order.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

17. Prior to the start of work, and if the project involves work adjacent to a Bordering Vegetated Wetland, the boundary of the wetland in the vicinity of the proposed work area shall be marked by wooden stakes or flagging. Once in place, the wetland boundary markers shall be maintained until a Certificate of Compliance has been issued by the Conservation Commission.
18. All sedimentation barriers shall be maintained in good repair until all disturbed areas have been fully stabilized with vegetation or other means. At no time shall sediments be deposited in a wetland or water body. During construction, the applicant or his/her designee shall inspect the erosion controls on a daily basis and shall remove accumulated sediments as needed. The applicant shall immediately control any erosion problems that occur at the site and shall also immediately notify the Conservation Commission, which reserves the right to require additional erosion and/or damage prevention controls it may deem necessary. Sedimentation barriers shall serve as the limit of work unless another limit of work line has been approved by this Order.
19. The work associated with this Order (the "Project")
- (1) is subject to the Massachusetts Stormwater Standards
- (2) is NOT subject to the Massachusetts Stormwater Standards

If the work is subject to the Stormwater Standards, then the project is subject to the following conditions:

- a) All work, including site preparation, land disturbance, construction and redevelopment, shall be implemented in accordance with the construction period pollution prevention and erosion and sedimentation control plan and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollution Discharge Elimination System Construction General Permit as required by Stormwater Condition 8. Construction period erosion, sedimentation and pollution control measures and best management practices (BMPs) shall remain in place until the site is fully stabilized.
- b) No stormwater runoff may be discharged to the post-construction stormwater BMPs unless and until a Registered Professional Engineer provides a Certification that:
- i.* all construction period BMPs have been removed or will be removed by a date certain specified in the Certification. For any construction period BMPs intended to be converted to post construction operation for stormwater attenuation, recharge, and/or treatment, the conversion is allowed by the MassDEP Stormwater Handbook BMP specifications and that the BMP has been properly cleaned or prepared for post construction operation, including removal of all construction period sediment trapped in inlet and outlet control structures;
- ii.* as-built final construction BMP plans are included, signed and stamped by a Registered Professional Engineer, certifying the site is fully stabilized;
- iii.* any illicit discharges to the stormwater management system have been removed, as per the requirements of Stormwater Standard 10;

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

- iv. all post-construction stormwater BMPs are installed in accordance with the plans (including all planting plans) approved by the issuing authority, and have been inspected to ensure that they are not damaged and that they are in proper working condition;
- v. any vegetation associated with post-construction BMPs is suitably established to withstand erosion.
- c) The landowner is responsible for BMP maintenance until the issuing authority is notified that another party has legally assumed responsibility for BMP maintenance. Prior to requesting a Certificate of Compliance, or Partial Certificate of Compliance, the responsible party (defined in General Condition 18(e)) shall execute and submit to the issuing authority an Operation and Maintenance Compliance Statement ("O&M Statement) for the Stormwater BMPs identifying the party responsible for implementing the stormwater BMP Operation and Maintenance Plan ("O&M Plan") and certifying the following:
- i.) the O&M Plan is complete and will be implemented upon receipt of the Certificate of Compliance, and
 - ii.) the future responsible parties shall be notified in writing of their ongoing legal responsibility to operate and maintain the stormwater management BMPs and implement the Stormwater Pollution Prevention Plan.
- d) Post-construction pollution prevention and source control shall be implemented in accordance with the long-term pollution prevention plan section of the approved Stormwater Report and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollution Discharge Elimination System Multi-Sector General Permit.
- e) Unless and until another party accepts responsibility, the landowner, or owner of any drainage easement, assumes responsibility for maintaining each BMP. To overcome this presumption, the landowner of the property must submit to the issuing authority a legally binding agreement of record, acceptable to the issuing authority, evidencing that another entity has accepted responsibility for maintaining the BMP, and that the proposed responsible party shall be treated as a permittee for purposes of implementing the requirements of Conditions 18(f) through 18(k) with respect to that BMP. Any failure of the proposed responsible party to implement the requirements of Conditions 18(f) through 18(k) with respect to that BMP shall be a violation of the Order of Conditions or Certificate of Compliance. In the case of stormwater BMPs that are serving more than one lot, the legally binding agreement shall also identify the lots that will be serviced by the stormwater BMPs. A plan and easement deed that grants the responsible party access to perform the required operation and maintenance must be submitted along with the legally binding agreement.
- f) The responsible party shall operate and maintain all stormwater BMPs in accordance with the design plans, the O&M Plan, and the requirements of the Massachusetts Stormwater Handbook.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

- g) The responsible party shall:
 - 1. Maintain an operation and maintenance log for the last three (3) consecutive calendar years of inspections, repairs, maintenance and/or replacement of the stormwater management system or any part thereof, and disposal (for disposal the log shall indicate the type of material and the disposal location);
 - 2. Make the maintenance log available to MassDEP and the Conservation Commission (“Commission”) upon request; and
 - 3. Allow members and agents of the MassDEP and the Commission to enter and inspect the site to evaluate and ensure that the responsible party is in compliance with the requirements for each BMP established in the O&M Plan approved by the issuing authority.
- h) All sediment or other contaminants removed from stormwater BMPs shall be disposed of in accordance with all applicable federal, state, and local laws and regulations.
- i) Illicit discharges to the stormwater management system as defined in 310 CMR 10.04 are prohibited.
- j) The stormwater management system approved in the Order of Conditions shall not be changed without the prior written approval of the issuing authority.
- k) Areas designated as qualifying pervious areas for the purpose of the Low Impact Site Design Credit (as defined in the MassDEP Stormwater Handbook, Volume 3, Chapter 1, Low Impact Development Site Design Credits) shall not be altered without the prior written approval of the issuing authority.
- l) Access for maintenance, repair, and/or replacement of BMPs shall not be withheld. Any fencing constructed around stormwater BMPs shall include access gates and shall be at least six inches above grade to allow for wildlife passage.

Special Conditions (if you need more space for additional conditions, please attach a text document):

See attached Findings and Special Conditions.

- 20. For Test Projects subject to 310 CMR 10.05(11), the applicant shall also implement the monitoring plan and the restoration plan submitted with the Notice of Intent. If the conservation commission or Department determines that the Test Project threatens the public health, safety or the environment, the applicant shall implement the removal plan submitted with the Notice of Intent or modify the project as directed by the conservation commission or the Department.

D. Findings Under Municipal Wetlands Bylaw or Ordinance

1. Is a municipal wetlands bylaw or ordinance applicable? Yes No
2. The Andover Conservation Commission hereby finds (check one that applies):
 - a. that the proposed work cannot be conditioned to meet the standards set forth in a municipal ordinance or bylaw, specifically:

1. Municipal Ordinance or Bylaw

2. Citation

Therefore, work on this project may not go forward unless and until a revised Notice of Intent is submitted which provides measures which are adequate to meet these standards, and a final Order of Conditions is issued.

- b. that the following additional conditions are necessary to comply with a municipal ordinance or bylaw:
Andover Wetlands Protection By-Law Article 14
 1. Municipal Ordinance or Bylaw 2. Citation
3. The Commission orders that all work shall be performed in accordance with the following conditions and with the Notice of Intent referenced above. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, the conditions shall control.

The special conditions relating to municipal ordinance or bylaw are as follows (if you need more space for additional conditions, attach a text document):

See attached Findings and Special Conditions

146 Dascomb Road Redevelopment Project

Amended Order of Conditions

DEP FILE NO. 090-1247 FINDINGS AND SPECIAL CONDITIONS

Findings

1. FINDING - THE MASSACHUSETTS WETLANDS PROTECTION ACT, M.G.L.C. 131, S. 40. The Andover Conservation Commission hereby finds that all or part of the property on which the work authorized by this Order is proposed is subject to jurisdiction under the Massachusetts Wetlands Protection Act, M.G.L.C. 131, s. 40. The owner is hereby notified of his or her responsibility to comply with the provisions of this statute. **This finding shall remain in effect in perpetuity and shall survive the issuance of a Certificate of Compliance.**
2. FINDING - NOTICE OF JURISDICTION UNDER THE ANDOVER WETLAND PROTECTION BYLAW. The Andover Conservation Commission hereby finds that all or part of the property on which the work authorized by this Order is proposed is subject to jurisdiction under the Andover Wetlands Protection By-Law, Article 14. The owner is hereby notified of his or her responsibility to comply with the provisions of this statute. **This finding shall remain in effect in perpetuity and shall survive the issuance of a Certificate of Compliance.**
3. FINDING - BORDERING VEGETATED WETLAND. The Conservation Commission relied upon an Order of Resource Area Delineation (DEP File # 090-1195) issued by the Commission on August 26, 2013 approving the boundary of Bordering Vegetated Wetland as shown on an ANRAD Plan prepared by RJ O'Connell & Associates, Inc. dated 7-19-13.
4. FINDING - INTERMITTENT STREAM. The Conservation Commission relied upon an Order of Resource Area Delineation (DEP File # 090-1195) issued by the Commission on August 26, 2013 approving the Intermittent Stream as shown on an ANRAD Plan prepared by RJ O'Connell & Associates, Inc. dated 7-19-13.
5. FINDING – SPECIAL CONDITIONS. The Andover Conservation Commission finds that all conditions set forth in this Order are necessary to protect the interests described in the Wetlands Protection Act and the Andover Wetlands Protection By-law. **This finding shall remain in effect in perpetuity and shall survive the issuance of a Certificate of Compliance.**
6. FINDING - 25-FOOT NON DISTURBANCE ZONE. The Andover Conservation Commission finds that work will occur within the 25-foot No-Disturbance Zone for roadway and safety improvements along Dascomb Road as depicted on the approved plans that will require a waiver under the Bylaw. The Commission relied upon information presented by TEC, Inc. in a Memorandum entitled Roadway

Improvements/Alternatives Analysis dated June 23, 2015 and further discussed and presented during the Public Hearing on July 7, 2015. The Commission also relied upon information presented by TEC, Inc. in a letter entitled Amended Order of Conditions Request dated July 8, 2022 further discussed and presented during the Public Hearing on July 18, 2022. The Andover Conservation Commission hereby grants a waiver for this work as depicted on the plans and conditioned in this Order. No other waivers are granted for this project.

7. FINDING - 25-FOOT NON DISTURBANCE ZONE. The Andover Conservation Commission finds that the roadway and safety improvements along Dascomb Road as shown on the approved plans will result in approximately 12,525 square feet of disturbance within the 25-foot No Disturbance Zone. The Applicant is providing 12,765 square feet of Buffer Zone restoration within the newly established on-site 25-foot No Disturbance Zone to compensate for this work. The Commission finds that based on the values associated with the 25-foot No Disturbance Zone on this site that this level of mitigation provides adequate compensation for this work within the 25-foot No Disturbance Zone. The Andover Conservation Commission grants relief from the 25-foot No Disturb Zone for the proposed roadway and safety improvements and associated grading. Temporary disturbances (such as that for grading) will be re-vegetated in place after construction.
8. FINDING - 25 FOOT PERMANENT NON DISTURBANCE ZONE PROTECTION. The Andover Conservation Commission hereby finds that the newly established “25’ NON-DISTURBANCE ZONE” depicted on the approved plan shall remain in effect in perpetuity. Following completion of the approved activities, no building or alteration is to occur in this restricted area. **This finding shall remain in effect in perpetuity and shall survive the issuance of a Certificate of Compliance.**
9. FINDING – CONSERVATION RESTRICTION. The Commission finds that the Army Corps of Engineers May 14, 2020 authorization under General Permits 8 and 10 requires preservation in perpetuity of 0.24 acres of land. In response to peer review comments to enlarge the land placed in preservation, the Applicant proposes to place a Conservation Restriction over 0.81 acres of land. Said Conservation Restriction shall in substance and form comply with the most up to date EEA CR template. The Commission further finds that the Applicant proposes to designate the Andover Conservation Commission or AVIS as the Grantee under the CR, such details to be resolved between Conservation Staff and the Applicant and in a final form ready for submission to the Commission and the Board of Selectman for their approval not more than 6 months from the date of issuance of this Amended OOC.
10. FINDING – CONSERVATION RESTRICTION MARKERS. Prior to issuance of a Certificate of Compliance or cessation of inspections by the Environmental Monitor, but not more than 12 months from the date of issuance of this Amended Order of Conditions, Conservation Restriction markers shall be installed approximately every 50-feet along the

Conservation Restriction boundary. This condition will be enforceable by the Andover Conservation Commission against the owner and/or its successors. **This finding shall remain in effect in perpetuity and shall survive the issuance of a Certificate of Compliance.**

11. FINDING CONSERVATION RESTRICTION REQUIRED DEED LANGUAGE. Prior to issuance of Certificate of Compliance any Deed (as defined below) for all or any portion of the property subject to this Order of Conditions which includes Conservation Restriction shall be recorded at the Registry of Deeds and contain the following language:

"This property is subject to Conservation Restriction in which no alteration of land or vegetation may occur. The Conservation Restriction is shown on the plans entitled _____, recorded at the Essex County Registry of Deeds, North District, at Book ____, Page ____, and/or registered with the Land Registration Office of the Essex County Registry District as Document No. _____ and as described in the Order of Conditions recorded in the same Registry at Book ____, Page ____, and/or in the same Registry District as Document _____. In accordance with said Order of Conditions, this language shall be incorporated in full into all future deeds, easements, mortgages, leases, licenses, occupancy agreements or any other instrument of transfer, whereby an interest in and/or a right to use the property or a portion thereof is conveyed (a "Deed")."

The plans referenced in this Order of Conditions shall be recorded with the Order of Conditions and cross referenced thereto in the Essex County Registry of Deeds and/or the Essex County Registry District. **This finding shall remain in effect in perpetuity and shall survive the issuance of a Certificate of Compliance.**

12. FINDING – BVW and BANK ALTERATION. The Andover Conservation Commission finds that 1,478 square feet of BVW and 384 linear feet of Bank will be lost for roadway and safety improvements along Dascomb Road. The BVW loss will be mitigated at a 2.37:1 ratio through creation of a Wetland Replication Area encompasses 7,700 square feet of BVW. The Bank loss will be mitigated through relocation of 565 linear feet of Bank resulting in an increase of 181 linear feet of Bank. The Commission finds that the above mitigation is an appropriate approach to providing wetland restoration/replication and Bank realignment under these circumstances with the site constraints particular to this site and project.

13. FINDING –LAWN/LANDSCAPE CHEMICALS WITHIN 100 FEET OF WETLAND. The Conservation Commission finds that in order to minimize the potential for adverse impacts on water quality, the use of any type of lawn or landscape chemical, pesticide or herbicide is prohibited in the 25-foot Non-Disturbance Zone and only organic, slow release, low-nitrogen type and phosphorous free fertilizers or herbicides are allowed within the area 75-100 feet horizontally from the boundary of Bordering Vegetated Wetland depicted on the approved plans. **This condition will be enforceable by the**

Andover Conservation Commission against the owner and/or its successors. This condition shall remain in effect in perpetuity.

14. FINDING – STOCKPILING OF MATERIAL WITHIN THE BUFFER ZONE. The Conservation Commission finds that there shall be no stockpiling of material within the 100 foot buffer zone other than the stockpiling of material directly associated with the proposed stream relocation and wetland replication.
15. FINDING – CASH OR SECURITY BOND. Prior to Commencement of work, the Applicant’s representatives shall prepare a cost estimate for all work and materials occurring within wetland resource areas or the 100-foot buffer zone to establish an adequate cash or security Bond. **The Applicant shall deposit with the Conservation Commission said cash or Security Bond**, not less than 48 hours prior to commencement of work.
16. FINDING – DIGITAL FILE FOR WETLAND RESOURCES. Prior to commencement of work, the applicant shall provide to the Andover Conservation Commission a digital file containing the file of the confirmed boundary of resource areas. The file format shall be in AutoCAD DWG (or ASCII DXF) version 2010 or earlier and Adobe PDF, delivered on CD-ROM or DVD-R media. AutoCAD file delivery shall be in full model view. The digital file shall include property boundaries, dimensions, easements, rights-of-way, edge of pavement, edge of side walk, edge of water bodies, wetland boundaries, topographic contours, spot elevations, etc. Said digital data shall be delivered in Massachusetts State Plane Coordinate System, North American Datum 1983 and North American Vertical Datum 1988, in U.S. Survey Feet.
17. FINDING - RELIANCE UPON PEER REVIEW. The Conservation Commission is in partial reliance upon a peer review of the filing completed by Ann M. Marton, President and Director of Ecological Services, LEC Environmental Consultants, Inc. (LEC) and Janet Bernardo, P.E. of Horsley & Witten Group (HWG). The documentation for this review is comprised of the following:
 - a. Preliminary Email Review Comments from Ann Marton of LEC to Rick Friberg of TEC, Inc. dated June 1, 2015.
 - b. Proposed Dascomb Road Redevelopment Peer Review Report prepared by HWG dated June 3, 2015.
 - c. Proposed Dascomb Road Redevelopment Peer Review Report prepared by HWG dated July 7, 2015.
 - d. Peer Review Report Dascomb Road Redevelopment prepared by LEC dated July 7, 2015.
 - e. Peer Review Report Dascomb Road Redevelopment prepared by LEC revised July 24, 2015.
 - f. Email Review Comments from Ann Marton of LEC to Rick Friberg of TEC, Inc. dated January 4, 2016.

- g. Summary Peer Review Memorandum from Ann Marton of LEC to the Commission dated July 11, 2022.

Special Conditions

- 18. Work shall conform to the plans referenced on Page 2, Section A.8. of this Order and to the following documents and materials that were partially relied upon by the Commission in determining to issue this Order of Conditions. To the extent that information contained in reports and on the plans differ, the plans control. If necessary, direction or clarification may be sought from the Conservation Agent or designated Environmental Monitor.
 - a. Pre-Construction Notification and Basic Mitigation Plan 146 Dascomb Road, Andover, MA 01810 dated February 28, 2020.
 - b. Department of the Army US Army Corp of Engineers authorization File Number: NAE-2019001248 dated May 14, 2020 (attached).
 - c. Amended Order of Conditions Request prepared by TEC dated June 16, 2022.
 - d. Response to Comments by LEC Environmental Consultants, Inc. 1/10/2022 Amended Order of Conditions Request prepared by TEC dated June 22, 2022.
 - e. Amended Order of Conditions Request prepared by TEC dated July 8, 2022.

Only work explicitly described on the plans referenced on Page 2, Section A.8. of this Order and described in the above-referenced documents is authorized under this Order of Conditions.

- 19. The Commission and its consultants, in evaluating the submittals and supporting documents, have relied solely upon the data and representations made by the Applicant and its representatives. Accordingly, the Applicant shall indemnify and save harmless the Commission, its consultants, Agents, and the Town of Andover against any and all claims arising out of or in connection with any work or structures authorized herein. Any discrepancies, errors or omissions discovered may result in revocation, suspension or modification of this Order without liability to the municipality or its consultants or Agents.
- 20. **All materials required to be submitted to the Commission shall also be submitted to the Environmental Monitor for review and approval. For the purposes of this order, the Environmental Monitor functions as an Agent of the Commission.**
- 21. This Order of Conditions shall be made part of all construction documents for this project. This document shall be included in all construction contracts including subcontracts dealing with work proposed and shall supersede any conflicting contract requirements. All contractors working at the site shall be made aware of the provisions contained within this Order of Conditions and shall adhere to all the Special Conditions contained herein. The applicant, or his designee, shall, at all times, have a copy of the Final Order of Conditions at the site and shall monitor compliance with the provisions of

this Order.

22. Until the Certificate of Compliance to this Order is issued, a Conservation Commissioner or an Agent of the Commission reserves the right to enter and inspect the property at reasonable times in order to evaluate compliance with this Order and any instructions or orders issued pursuant to this Order. Such parties may require any information, measurements, photographs, and/or materials or may require any additional information deemed necessary for that evaluation. Further, work shall be halted onsite if the Conservation Commissioner or agent of the Commission determines that any of the work is not in compliance with the Order. Work shall not resume until the Commission is satisfied that the work will comply with the Order and has so notified the applicant in writing.
23. This Order shall apply to any successor in control in interest of the property described in the Notice of Intent and accompanying plans, and to any contractor or other person performing work conditioned by this Order. These obligations shall be expressed in all deeds to succeeding owners of all or portions of the property. (This is in addition to DEP's Standard Condition under B. Findings, General Conditions 16.)

Pre-Construction

24. Prior to commencement of work, the applicant shall have received all other required federal, state, and/or local permits required by law including, if necessary, but not limited to an EPA NPDES Stormwater Permit.
25. Prior to commencement of work, the sign displayed according to B. Findings General Condition 10 must say **DEP & ACC File No. 090-1247**. This sign is not to be attached to a living tree.
26. Prior to the commencement of any work onsite, the limits of all wetland resource areas shall be re-established with surveyors tape. Once established, said markers shall be checked and replaced as necessary and shall be maintained until all construction has been completed and a Certificate of Compliance has been issued. Note: This is in addition to DEP's Standard Condition under B. Findings, General Condition 17.
27. The developer or contractor responsible for the project's completion shall be notified of, and understand, the requirements of this Order of Conditions. The developer and/or contractor shall acknowledge receipt of the Order of Conditions by submitting a letter to that effect to the Conservation Commission. A copy of this Order, as well as copies of the above-mentioned documents, plans, and reports shall be on-site while activities regulated by this Order are being performed.
28. **EROSION CONTROLS** - Prior to commencement of work, the erosion control line shall be staked in the field by a Professional Land Surveyor for inspection by the Commission or an Agent of the Commission prior to installation of the erosion controls.

Following approval of the staked limits of the erosion control boundary, the erosion

controls shall be installed between all disturbed areas and the wetlands to prevent the introduction of sediment into any wetland resource area. All siltation and erosion controls shall be installed as specified on the Plan. A written request for inspection of the erosion control shall be submitted to the Conservation Commission, and a satisfactory inspection performed before any land-disturbing activity may commence. This inspection may be coupled with the pre-construction meeting referenced in Special Condition 33. The Conservation Commission or its Agents may require other sediment controls as field conditions warrant. The siltation control device shall be the Limit of Construction beyond which no earth-disturbing activity shall occur or heavy equipment shall be allowed. All siltation and erosion controls shall be maintained in a state of good repair. The siltation control devices shall not be removed until the Commission or its Agent has reviewed and found satisfactory the stabilization of the disturbed area.

At all times during construction, the Applicant shall maintain an on-site stockpile of erosion controls sufficient to respond to any emergency problem that may arise. Such stockpile must be replenished as it is used.

29. CONSTRUCTION OVERVIEW BY DESIGN ENGINEER. The applicant shall be responsible to secure the services of a design engineer or similarly credentialed professional on an on-going basis throughout all phases of the project, which are within the jurisdiction of this Order of Conditions to generally oversee the work and ensure compliance with the conditions of this Order. **The name and credentials of the individual *must* be submitted to the Commission prior to the Pre-Construction Meeting referenced in Special Conditions 33.**
30. WETLAND SCIENTIST. The Applicant shall retain a Wetland Scientist to monitor and supervise all work within the BVW, the stream relocation, creation of the wetland replication area, and installation of the plantings in the wetland replication area and the buffer zone to ensure such work is conducted in accordance with this Order and standard industry practices. **The name and credentials of the individual *must* be submitted to the Commission prior to the Pre-Construction Meeting referenced in Special Conditions 33 and be approved by the Conservation Commission *prior* to commencement of work.**
31. CONSTRUCTION OVERVIEW BY ENVIRONMENTAL MONITOR/REPORTS. In accordance with Massachusetts General Laws Chapter 44, §53G, the Conservation Commission requires that the applicant provide funds **prior to commencement of work** to the Commission for the reasonable fees of a consultant with professional credentials to be selected by the Commission to review and/or approve the inspection of work thereunder. Such fees shall be an estimate of inspections which shall take place during once every 7 calendar days and within 24 hours of the end of a storm event having ½ inch of rainfall or greater within a twenty-four hour period, throughout the duration of the project and required inspections associated with the proposed wetland filling, stream relocation, wetland replication, and buffer zone plantings. This period shall begin when siltation controls are installed, and shall end with issuance of a Certificate of Compliance. **Since the fees are an estimate, additional fees may be required pending the duration**

of the project and/or overpayment returned to the applicant upon the issuance of a Certificate of Compliance.

Weekly logs/reports shall be maintained and submitted at a minimum on a monthly basis to the Conservation Commission and shall state whether such work is in his or her opinion in compliance with the Order of Conditions. The Conservation Commission reserves the right to require submission of such reports on a more frequent interval. The Conservation Commission also reserves the right to authorize the consultant to reduce the number of weekly inspections submitted on a monthly basis at their discretion.

The applicant must request approval for temporary cessation of reports in writing prospectively. **This request must have the prior approval of an Agent for the Commission.** Failure to submit satisfactory reports shall be deemed sufficient cause for revocation of this permit without further review.

32. The Applicant shall provide the Andover Conservation Commission and/or its Agent with the names and 24-hour, 7 days/week phone numbers of the on-site construction manager(s) who are responsible to coordinate the construction and ensure compliance with this Order.
33. Not more than 2 weeks prior to the commencement of work, a pre-construction meeting shall be held with the Conservation Agent and the Commission's Environmental Monitor, and the Applicant's On-Site Construction Manager, Project Engineer, and Wetland Scientist to review and discuss the Order of Conditions, construction procedures, methods, and erosion controls. Prior to requesting the pre-construction meeting, the applicant shall submit the following to the Conservation Commission:
 - a. A statement that the items enumerated in Special Conditions 24 through 32 have been executed and the required supporting information has been provided to the Commission;
 - b. A set of photographs depicting the project site in the pre-construction condition; and
 - c. A statement signed by the Applicant, owner of the property, and the person responsible for the construction of the project that such individuals understand the terms and conditions as specified in the Order and that such persons agree to comply with the referenced provisions.
34. The Andover Conservation Commission and its Agents shall be notified in writing at least two (2) business days in advance of commencement of work to enable the Commission to inspect the site to ensure compliance with the conditions.

Wetland Replication and Stream Relocation

35. Extreme care shall be employed to ensure that the area of existing wetlands to be altered shall not exceed the limits as shown on the approved plans.

36. All wetland and stream relocation work shall be supervised by a Wetland Scientist to ensure compliance with the Order and the plans, to document that disturbance is avoided or minimized to the greatest extent, and to evaluate the process upon completion. The Wetland Scientist shall make a photographic record of the pre, during, and post-construction condition of the BVW and stream to facilitate the Commission's review of the area. A progress report detailing the findings and actions taken shall be submitted to the Commission at the end of each week until completion of the wetland filling, stream relocation, wetland replication, and buffer zone plantings.
37. The proposed Wetland Replication and Stream Relocation shall be constructed at the same time or immediately prior to the proposed retaining wall, backfilling to support future roadway and safety improvements along Dascomb Road.
38. All wetland replication and stream relocation shall be accomplished under the supervision of the Applicant's Wetland Scientist. A progress report shall be provided to the Conservation Commission at the end of each week until wetland replication and stream relocation work is complete.
39. The wetland replication and stream relocation shall be constructed in accordance with the requirements of 310 CMR 10.55(4) and 10.54 (4), and all notations on the plans. The subgrades and final grades within the wetland replication and stream relocation shall be reviewed and approved by the Commission's Agent and the Applicant's Wetland Scientist prior to planting.
40. All wetland plantings are to be performed by hand. Wetland plants are to be inspected by the Applicant's wetland scientist prior to installation to ensure proper quantity, size, and species as specified on the plans. Only native species shall be used, no cultivars. The final planting layout shall be inspected by the Commission's Agent and the Applicant's Wetland Scientist prior to planting.
41. It is intended that at least 75 percent of the replication area be re-established with indigenous wetland plant species and that at least 75 percent of the woody vegetation has survived within five growing seasons of their planting. Invasive or exotic species shall not be planted or allowed to remain in the replication areas. If at any point during post construction monitoring, it is evident in the opinion of the Applicant's Wetland Scientist that the above standards will not be achieved, the Applicant shall supplement the plantings as necessary to achieve the required coverage. If after the end of five growing seasons, 75 percent re-establishment has not been achieved or at least 75% of the woody plants have not survived, the Applicant shall provide healthy wetland vegetation in sufficient quantity to achieve the 75 percent re-establishment criteria as directed by the Applicant's Wetland Scientist.
42. The Applicant's Wetland Scientist shall monitor the Wetland Replication Area for five consecutive growing seasons, conducting spring and fall monitoring visits to document conditions within the wetland replication area. A detailed report shall be prepared by the Applicant's Wetland Scientist and submitted to the Commission no later than November

1st of each year during the five-year monitoring period to document the yearly monitoring visits. Each report will include an observed species list, relative abundance of each species, percent cover of upland and wetland species, the viability of the plantings, invasive species and removal recommendations, proposed remedial measures to ensure 75 percent re-establishment, and photographs.

43. Prior to the issuance of the final Certificate of Compliance for the project, the Applicant's Wetland Scientist shall certify to the Commission that the replication area has achieved the 75 percent re-establishment.

Construction

44. CERTIFIED PLAN. Within ten days of the installation of the base course of the proposed retaining wall along Dascomb Road, **but in every case prior to completion of the wall**, the Applicant shall submit to the Conservation Commission a Certified Plan prepared by a Registered Land Surveyor. Said plan shall be sufficiently detailed to show the horizontal location of the foundation with respect to the property lines, wetland boundaries, foundation elevations, etc. The intent of this Certified Plan is to ensure the proper field location of the retaining wall in comparison to the approved plan. No further construction may occur until the Certified Plan has been approved by an Agent of the Commission.
45. GRADING AND STABILIZATION. Grading shall conform to the plans and data referenced above. In all cases final grades shall have a minimum of four inches of topsoil (measured in place) over all disturbed areas. In all cases exposed soil areas shall be stabilized with vegetation, e.g., grass or some form of ground cover plant. In no case shall wood chips, mulch, or similar covering be acceptable on sloping ground in lieu of vegetation.
46. SURPLUS EARTH MATERIAL. It shall be the responsibility of the Applicant to ensure that any and all surplus materials that are not needed for use on the project are lawfully disposed of outside any area subject to protection under M.G.L.c 131, s. 40. Excavated material not used for backfill shall be removed from the area and properly disposed of by the contractor. Records shall be kept documenting that the excess material has been properly disposed of at a legal site. If requested, a manifest or bill, as applicable, shall be provided to the Conservation Department documenting the legal disposal of excavated materials, building debris, concrete, asphalt, and/or materials removed from the site including that material removed from dumpsters and until a Certificate of Compliance is issued.
47. CONTROL OF CONSTRUCTION DEBRIS. No construction debris (paper, wood, metal, concrete, etc.) may be allowed to enter the wetland resource areas or buffer zone at any time. Windblown material shall be promptly removed from wetland resource areas and buffer zones. There shall be no dumping of leaves, grass clippings, trash or any kind of refuse in areas under the Conservation Commission's jurisdiction.

48. DAMAGE TO RESOURCE AREAS. Any damage caused as a direct result of this project to any wetland resource areas, beyond that authorized by the Order, is the responsibility of the applicant to repair, restore or replace. Sedimentation or erosion into these areas shall be considered damage to wetland resource areas. The Commission shall be promptly notified of any damage to wetland resource areas. Following notification, the applicant must submit a plan for abatement of the problem and restoration. This plan must be approved by the Conservation Commission prior to implementation.
49. UNFORSEEN PROBLEMS. If unforeseen problems occur during construction which may affect the interests of the Wetlands Protection Act or the Town of Andover Wetlands Protection Bylaw, the Commission shall immediately be notified and a meeting shall be held between the Commission or its Agent, the applicant and other concerned parties to determine appropriate corrective measures agreed upon. Subsequent to the resolution, the activity and resulting actions shall be documented in writing.
50. CLEAN FILL. All fill used in connection with this project shall be clean borrow. The following shall be prohibited: chemically contaminated material; concrete and asphalt rubble; stumps and other solid waste.
51. DEWATERING. In the event that dewatering is required within any area subject to the Commission's jurisdiction or such water is discharged within the Commission's jurisdiction, the Applicant shall notify the Commission at least 2 business days in advance of such work and shall be responsible to ensure that such water is free of suspended solids before being discharged toward a wetland or into any storm water system. This condition applies to all forms of dewatering, including pumping and trenching. Any dewatering areas shall be monitored daily to ensure that sediment laden water is appropriately settled prior to discharge toward the resource areas. No discharge of water is allowed directly into any wetland resource area. Dewatering shall be performed using a settling basin and/or a silt sock TM or approved equivalent filtering device. The filtering device shall be laid such that the end is at least 50 feet from the edge of any wetland above the sediment control line. During dewatering, the device shall be monitored and replaced as needed. Sediment from the device shall be disposed of properly.

Certificate of Compliance

52. Not more than thirty days following completion of the project, the applicant shall submit with their request for a Certificate of Compliance, an affidavit prepared by a professional engineer or land surveyor registered in the Commonwealth of Massachusetts, stating that the site has been developed in accordance with the requirements of this Order of Conditions, based upon an on-site inspection and the referenced site plan. An as-built drawing, prepared by a Professional Land Surveyor or Professional Engineer, registered in the Commonwealth of Massachusetts, and depicting the final and actual condition of all areas within the jurisdiction of the Massachusetts Wetlands Protection Act or the Andover Wetlands Bylaw shall accompany such request.

53. If the completed work differs from that on the original plans and/or conditions listed in this Order, a report must be submitted to the Commission thirty (30) days prior to completion specifying how the work differs, at which time the applicant shall first request a modification to the Order. Upon review and approval by the Commission, the applicant may request in writing a Certificate of Compliance.
54. The Request for a Certificate of Compliance shall be submitted using WPA Form 8A. The Conservation Commission will not consider issuing a Certificate of Compliance until the following items are submitted to, and accepted by, the Commission:
 - a. A written narrative certifying compliance prepared by a Professional Engineering registered in the State of Massachusetts with the conditions and approved plans and Order of Conditions, setting forth any deviations that exist and their potential effect on the project;
 - b. Post construction photographs demonstrating compliance with the Order including established vegetation where required;
 - c. A written certification by the Applicant's Wetland Scientist that the replication areas have achieved 75 percent re-establishment criteria, setting forth any deviations that exist and their potential effect on the project or its compliance with the Order of Conditions; and
 - d. A written request for a Certificate of Compliance.
55. The original Certificate of Compliance signed by the Commission must be recorded at the North Essex Registry of Deeds and proof of such recording must be provided to the Commission.

E. Signatures

This Order is valid for three years, unless otherwise specified as a special condition pursuant to General Conditions #4, from the date of issuance.

1. Date of Issuance

Please indicate the number of members who will sign this form.

This Order must be signed by a majority of the Conservation Commission.

2. Number of Signers

The Order must be mailed by certified mail (return receipt requested) or hand delivered to the applicant. A copy also must be mailed or hand delivered at the same time to the appropriate Department of Environmental Protection Regional Office, if not filing electronically, and the property owner, if different from applicant.

F. Appeals

The applicant, the owner, any person aggrieved by this Order, any owner of land abutting the land subject to this Order, or any ten residents of the city or town in which such land is located, are hereby notified of their right to request the appropriate MassDEP Regional Office to issue a Superseding Order of Conditions. The request must be made by certified mail or hand delivery to the Department, with the appropriate filing fee and a completed Request for Departmental Action Fee Transmittal Form, as provided in 310 CMR 10.03(7) within ten business days from the date of issuance of this Order. A copy of the request shall at the same time be sent by certified mail or hand delivery to the Conservation Commission and to the applicant, if he/she is not the appellant.

Any appellants seeking to appeal the Department's Superseding Order associated with this appeal will be required to demonstrate prior participation in the review of this project. Previous participation in the permit proceeding means the submission of written information to the Conservation Commission prior to the close of the public hearing, requesting a Superseding Order, or providing written information to the Department prior to issuance of a Superseding Order.

The request shall state clearly and concisely the objections to the Order which is being appealed and how the Order does not contribute to the protection of the interests identified in the Massachusetts Wetlands Protection Act (M.G.L. c. 131, § 40), and is inconsistent with the wetlands regulations (310 CMR 10.00). To the extent that the Order is based on a municipal ordinance or bylaw, and not on the Massachusetts Wetlands Protection Act or regulations, the Department has no appellate jurisdiction.

G. Recording Information

Prior to commencement of work, this Order of Conditions must be recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land subject to the Order. In the case of registered land, this Order shall also be noted on the Land Court Certificate of Title of the owner of the land subject to the Order of Conditions. The recording information on this page shall be submitted to the Conservation Commission listed below.
