The remaining exterior wall with window frames, trim, siding, and framing needs to be removed so as to gain access to the bent beam. The framed columns on each end of the beam must be exposed by taking off all the framing, siding, and trim. With the beam and the columns exposed they can then be removed and disposed of off-site. The vertical columns must be looked at by the engineer and if approved, the new 12X26 steel beam can be put in place and secured by the welding subcontractor. The footings can then be repaired or replaced and the new facade can be re-framed and finished to match the way it was. Per Code and Engineer's mandate, two new	JOHN T HAFFEY	\$59,950.00	\$804.35
