

Who is Public Works?

We are Public Works and are comprised of many divisions that work to maintain and improve Andover's infrastructure and services.

Department of Public Works Divisions:

Administration, Business Office and Facility & Field Rentals, Engineering, Highway, Parks & Grounds, Forestry, Spring Grove Cemetery, Vehicle Maintenance, Water Treatment, Water Distribution & Sewer Collection, and Recycling & Solid Waste.

Today let's introduce our **Administration, Business Office and Facility & Fields Rental** teams.

Christopher Cronin, Director of DPW along with his team of Superintendents make up the Administrations management that oversees a department of 80 employees and provides leadership striving to supply the best services that can be offered to residents, businesses, and visitors.

The Business Office provides daily administrative support to all divisions including customer service, purchasing, financial tracking, social media, etc. We sell compost site permits, pay invoices, assist with questions and concerns that come in through phone calls and emails.

Facility and Field Rentals schedules rentals and activities of Town and School buildings, fields and the Townhouse. This is the team that schedules the fields and gymnasiums needed for sporting events, Recreational Department programs, and clinics and camps during the year. They also schedule the Townhouse in downtown Andover for weddings, birthday parties, graduation parties, religious celebrations and much more. More information on the Townhouse can be found at andovertownhouse.com.
