****Trash & Recycling Update****

Recycling Market Update:

Like other commodity businesses, recycling is subject to booms and busts. Recycling is tied to commodity prices, which tend to fluctuate. In 2021-2022, markets continue to rebound, with the exception of glass which has stayed at a negative value throughout the year. The recycle ton (all commodity values combined) broke into positive values a few times during FY2022, but generally stayed below zero and remained a cost instead of a rebate applied to the cost of collection.

Mass DEP Waste Bans - Mattresses and Textiles

The Massachusetts Department of Environmental Protection (MassDEP) has made amendments to its waste ban regulations which includes the banning of mattresses and textiles from the trash stream and requiring them to be recycled.

What does this mean? This means that mattresses, box springs and textiles cannot be collected curbside, and must be brought to recyclers for processing. These items cannot be processed with curbside recycling. Mattresses and box springs will no longer qualify as a bulk item **starting Monday, September 12th, 2022.**

What do I do with a mattress & or box spring after this deadline? When you purchase a new mattress, ask the retailer to collect your old one. If you do not have a mattress purchase and need curbside disposal, please visit utec-mattress.org/schedule and select Andover, to schedule a curbside pickup. Residents can also drop off at their facility by appointment. Residents are free to use other private disposal options if they so choose. As with large appliances/white-goods, or other banned items, residents are responsible for associated costs.

Never miss your collection day again!

The Andover Department of Public Works recently launched an app called Andover MA Solid Waste that makes it easier for residents to know how to dispose of specific items, view collection schedules and stay updated on any service changes or delays. Visit AndoverMa.Gov/SolidWaste to view the app or download it to your smart phone.

Attention - PLEASE KEEP THESE ITEMS OUT OF YOUR BIN!

Save Water

Water is a finite resource – even though about 70 percent of the Earth's surface is covered by water, less than 1 percent is available for human use. Despite the water supply and infrastructure challenges faced by many communities across the US, each American uses an average of 88 gallons of water each day at home. Reduce, Reuse, Recycle isn't just for trash and recycling, these practices can help conserve water too. Please do your part to save water at home, inside and out. View AndoverMA.Gov/SaveWater for more information.

Help Keep Our Storm Drains Clean

The Town is continuing to implement a Stormwater Management Program to improve water quality by reducing the discharge of pollutants from storm water runoff into local storm drains, rivers, ponds, streams and other receiving waterbodies. The following information is provided as part of the Public Education component.

ILLICIT DISCHARGE DETECTION AND ELIMINATION

What is an illicit discharge?

An illicit discharge is the discharge of pollutants or non-stormwater materials into a storm drain system via overland flow, direct dumping, or illegal connections. Illicit discharges may be a result of industrial activity, deposits of oil on parking lots, excess lawn fertilizer and yard clippings, and a variety of other sources which pollute water with turbidity, excess nutrients, and bacteria. Illicit discharges can also be from failing septic systems or improperly connected sewer lines. Dumping anything other than stormwater into a storm drain allows these pollutants to enter lakes and streams causing public health concerns, harm to wildlife, and unpleasant odors or color. Developing an illicit discharge detection and elimination program (IDDE) to find and eliminate these sources is mandated by the US EPA under the Municipal Separate Storm Sewer System (MS4) Permit.

Sources of Illicit Discharges

- Sanitary wastewater (sewage)
- Septic tank waste or overflows
- Car wash, laundry, and industrial wastewaters
- Improper disposal of auto and household toxics, such as motor oil, antifreeze, and pesticides
- Spills on roadways and other accidents

How can you help?

- Never dump anything down a storm drain
- Dispose of yard and pet waste properly
- Avoid excess use of pesticides and lawn fertilizers
- Wash your car at a car wash facility
- Make sure sanitary, laundry, carwash, and industrial wastewaters do not drain to the storm drain system
- Have your septic tank pumped and inspected at least once every two years

Contact the Engineering Dept. @ 978-623-8770 to report any unusual storm drain flows that have a noticeable odor, discoloration, or oily sheen. Visit AndoverMa.Gov/Stormwater for more information
