

Andover Energy Success Stories

Andover's Energy Management Office has promoted conservation and renewable energy projects to achieve a goal of 20% energy reduction. Andover saves \$250,000 annually from making Town facilities and school buildings more energy efficient.

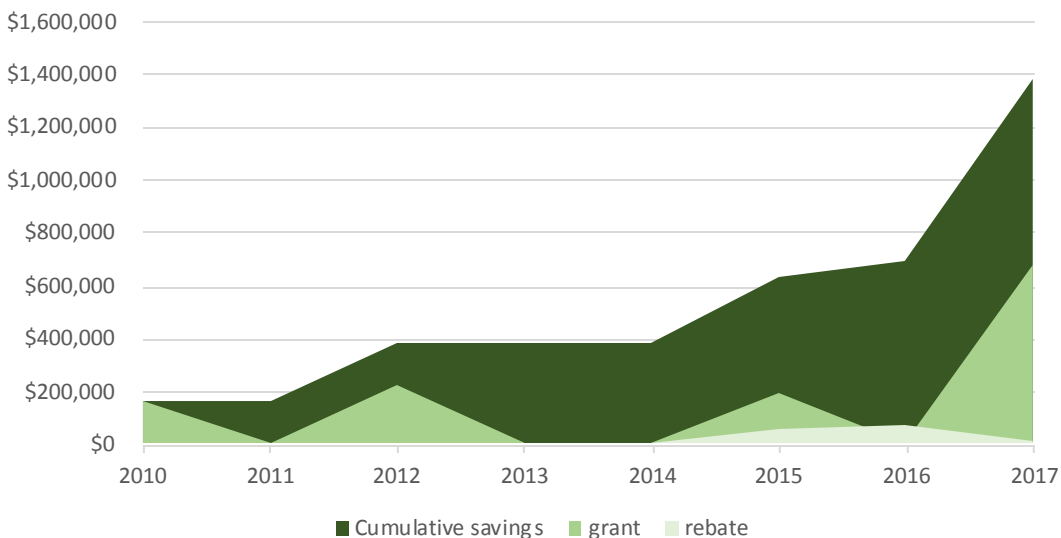

Andover's Energy Management Office has been awarded over \$1,000,000 in grants and utility incentives towards efficiency projects.

This year, we are planning to complete upgrades to heating system at the Town House, lighting upgrades in the Collins Auditorium, installation of new LED lighting in three schools, and retrofitting the hot water system in the South Elementary.

Andover has purchased its streetlights from National Grid with plans to retrofit to LED. The Town also signed an agreement to purchase 39% of municipal power from a [solar field in Palmer, MA](#). These two initiatives will save the Town over \$400,000 annually.

Cumulative Savings

This chart shows the cumulative savings the Energy Management Team has earned through grants and rebates since 2010.
