Re: Notice of Future Water Works Project Activities in Your Neighborhood

Dear Neighborhood Residents:

The Town of Andover Water Main Replacement Program will be replacing Water Mains in the Topping Road neighborhood to improve the reliability of water service to this area of town. The project area includes: Corbett Street, Topping Road, Juliette Street, McKenney Circle, Walker Avenue, Celia Street and North Main Street, Union Street, as well as easements between, Juliette Street and McKenney Circle.

This letter is to notify you that construction activities will begin in June 2019 during which time Towns Resident Engineer and the Towns Contractor will be onsite in the project area (in streets and easements) to begin the construction work, mark the locations of existing utilities and wetlands. Construction activities will occur during daylight hours and will include the temporary water main installation to serve existing properties during the construction period. Please expect traffic patterns to be adjusted with temporary road closures. Side line street parking will be prohibited during construction.

Water main installations will be within town owned land, easements and right of ways; however, during design activities project team members may need to walk through or near private properties.

Once the Water main Construction is completed the roadway will receive temporary trench width pavement with full roadway paving will completed the following spring Construction of the new water mains is will to occur in the spring thru fall of 2019.

If you have any questions please contact Morris Gray, Superintendent Water and Sewer. (978) 623-8700, mgray@andoverma.gov.

Thank you for you cooperation with this project.
