ARTICLE 33	ZONING BYLAW AMENDMENT – SECTION 5.2 SIGN BYLAW
-------------------	--

To see if the Town will vote to amend Article VIII, Section 5.2 of the Andover Zoning Bylaws titled “Signs” by deleting the language stricken from the bylaw as shown below and adding the language in bold and italic which is shown as follows:

5.2 SIGNS.

[Amended 4-30-2002 ATM, Art. 57; 5-2-2005 ATM, Arts. 42, 43, 44, 45, 47 and 48; 5-26-2009 ATM, Art. 36]

5.2.1 Purpose.

The following sign regulations are intended to:

1. Preserve the historical ambiance, *small-town character* and aesthetic *appeal* character of the town;
2. *Preserve views of greenery and landscapes;*
3. ~~2.~~ Maintain public safety by eliminating potential hazards to motorists

and pedestrians created by distracting or confusing sign displays and excessive illumination;

4. Preserve the value of private and public property;

5. Preserve the non-commercial character of residential neighborhoods.

~~3. Encourage efficient communication for business identification and public information.~~

The following sign bylaws are crafted to be compatible with the 2015 decision of the Supreme Court in the case of Clyde Reed v. Town of Gilbert, Arizona and are intended to avoid constitutionally suspect regulations related to time limits on legal signs on private property. The Reed decision stated that sign bylaws which are content-based must withstand strict scrutiny. That is, the government must have a compelling reason to regulate speech based on content.

5.2.2 Definitions.

In this bylaw, the following terms shall apply:

1. *Sign*: A sign shall consist of any of the following elements:

- a. Lettering, words, numerals, emblems, trademarks, logos, images, drawings, pictures, graphics, pennants, streamers, or other devices of any material or construction, however displayed, whether as an independent structure or as part of a building or other structure or object;
- b. Any visual device designed to inform, attract or draw the attention of persons outside the premises on which the device is located, including messages within or attached to windows and doors;
- c. Any exterior building surface that is internally illuminated or decorated with gaseous tubing, LED displays or back lighting.

2. *Sign Area*: The area of the smallest horizontal or vertical rectangle enclosing the entire display area of the sign. The display area of a sign is the entire area, different in color or composition from the facade or common trim of the building, used to frame or provide a background for the sign. The display area may contain open space and irregular shapes if they are part of the sign. The display area shall also include internally illuminated, back-lit or decoratively lighted sign support structures if such elements are present. The area of double-sided signs shall be calculated using the area of only one face of the sign.

3. *Sign Height*: The distance measured from the ground level at the base of the sign to the top of the sign or support structure, whichever is higher. For freestanding signs, the land under or surrounding the sign may not be built up or elevated to reduce the calculated height of the sign.

4. *Sign Support Structure*: Any device, such as a pole, bracket or post, used to support a sign. The sign support structure shall be excluded from the calculation of the sign area if it contains none of the elements described in § 5.2.2.1 above, and, for freestanding signs, the total width of the support structure is less than 25% of the width of the supported sign.

5. Attached Sign: A sign that is either attached parallel to the facade of a building, facing in the same direction as the facade, or displayed on the fixed canopy or awning of a building.

[Amended 4-28-2010 ATM, Art. 49]

6. Freestanding Sign: A sign that is supported by its own structure and is not attached to a building or other structure.

7. Projecting Sign: A sign mounted perpendicular to the building facade.

8. Double-sided Sign: A freestanding or projecting sign having two parallel opposite faces separated by a distance of not more than 12 inches. A sign with two opposite faces that are not parallel shall be considered a double-sided sign if the two faces are joined to each other, or to a common support structure, at one end, and the angle of separation between the two faces does not exceed 30°.

~~**9. Temporary Sign:** A non permanent sign that is displayed for a limited duration. Temporary signs may be exterior (displayed on the exterior or outside of a structure) or interior (attached or displayed from the inside of a structure, viewed from the outside through a window or other opening).~~

~~**9.10. Portable or Removable Sign:** A temporary sign of any shape or configuration that is self supporting and not permanently fixed or mounted to the ground or to another structure.~~

~~**10.11. Internally Illuminated Sign:** A sign that is illuminated by a light source internal to the sign. Signs having a light source that forms the exterior surface of the sign or all or part of the design elements, shall be considered to be internally illuminated.~~

~~**11.12. Nonconforming Sign:** A sign, including its support structure, that does not conform to the regulations prescribed in this bylaw, but which was in existence at the time the regulations became effective and was lawful at the time it was installed or erected.~~

~~**12.13. Open Space:** For the purposes of this Section 5.2. open space shall be defined as undeveloped land available to the public at no cost, for passive recreation such as hiking, bird watching, fishing, photography, picnicking, cross country skiing, biking, horseback riding or other activities which do not alter or disturb the terrain and at the same time to conserve natural and scenic resources, protect air, streams or water supply, and enhance the value of the land to the public.~~

~~**13.14. Awning:** A fixed or retractable structure, whether made of canvas, plastic, metal or other material, placed over a storefront, door or window. For the purpose of this Section 5.2. Signs, awnings shall not be considered a sign. The area of a sign displayed on an awning consists of the area encompassed by any lettering, symbols, or graphic elements distinct from the awning background color.~~

5.2.15 Design Guidelines for Signs.

The following are further means by which the objectives for signs stated in Section 5.2.1 can be served. These guidelines are not mandatory, but the degree of compliance with them shall be considered by the Special Permit Granting Authority in acting upon special permits, and by the Design Review Board as authorized hereunder.

1. Efficient Communication.

~~a. Signs should not display brand names, symbols or slogans of nationally distributed products except in cases where the majority of the floor or lot area of the premises is devoted to manufacture, processing or sale of that specific product.~~

~~b. Premises chiefly identified by or associated with a specific product brand name (such as gasoline or automobiles) should devote some part of their permitted sign area to displaying the identity of the local outlet or proprietor.~~

~~c. Signs should not contain advertising slogans or other advertising material which is not an integral part of the name or other identification of the product or enterprise.~~

~~a.d.~~ Sign content normally should not occupy more than 40% of the sign background, whether a signboard or a building element.

~~b.e.~~ Non-verbal devices should be considered, in addition to text, as such graphic images can provide rapid and effective communication as well as character.

2. Environmental Relationship.

a. Sign brightness should not be excessive in relation to background lighting levels, e.g., averaging not in excess of one-hundred-foot-lamberts in the downtown or similarly bright areas and not in excess of twenty-foot-lamberts in unlighted outlying areas.

3. Relationship to Buildings.

a. Signs should be sized and located so as to not interrupt, obscure or hide the continuity of columns, cornices, eaves, sill lines or other architectural elements of the building and, wherever possible, should reflect and emphasize the building's architectural form.

b. Sign materials, colors and lettering should be representative of and appropriate to the character of the building to which the sign relates, just as sign size should be related to building size.
