

Community Design Team Discussions

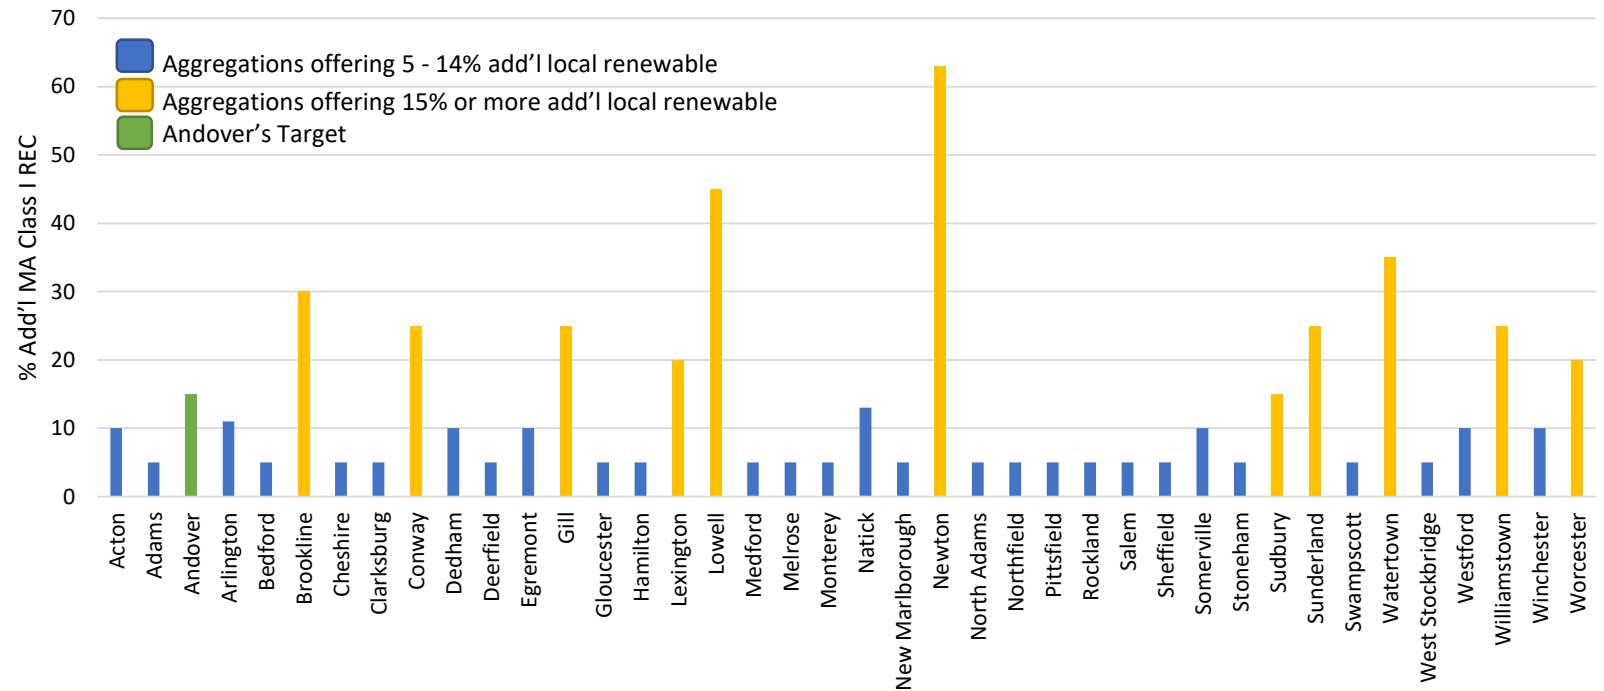

- CCA Design Team
 - Met 6 times between November and January
 - Studied Andover demographics and other green aggregations in MA
 - Products
 - Basic – 0% additional local renewable
 - Standard – target 15% additional local renewable
 - Opt Up - 100% additional local renewable (with possibility of a 50% additional local renewable product as well)
 - Next steps
 - Post draft plan for public comment (Feb)
 - Listening sessions (AGAB, Council on Aging, WECAN and others)
 - Meet with DOER
 - Submit plan for Select Board decision (Mar)
 - Send approved plan to DPU
 - Develop branding and marketing strategies
 - Launch official program website

Why Target 15% Add'l Local Renewables in the Standard

- Most aggregations do NOT offer more local renewable energy than state requirements in their standard product
- Among the 39 communities that do, **only 11** offer 15% or more local renewable energy in their standard product
- 15% additional means Andover will be in the **top 10%** of all aggregations in the State
- 15% also minimizes the risk of customers paying more than Basic Service given the current upward trend of the MA Class I REC market

% Additional Local Renewable in Standard Aggregation Product
Across 39 Leading Communities in MA
(State Requirement in 2021 is 18%)

Disclaimer: Future savings cannot be guaranteed because future Basic Service rates are unknown.
