

ALKALINE STANDARD AND HEAVY DUTY BATTERIES:

Dispose of in your curbside trash

All alkaline batteries made since 1994 contain no added mercury and only contain trace amounts that are not hazardous.

Be sure to read the packaging or battery; some rechargeables can look similar to alkaline.

LITHIUM AND STANDARD SIZE RECHARGEABLE BATTERIES:

Drop off at designated locations

Town Offices - Health Department

Location: 36 Bartlet Street, 1st floor

You may bring: Button and small standard size lithium and rechargeable batteries (standard sizes)

Municipal Services Facility - Public Works Department

Location: 5 Campanelli Drive, 2nd floor

You may bring: Button and small standard size lithium and rechargeable batteries (standard sizes)

- No rechargeable battery of any kind should ever be placed in your trash can or dumpster
- To prevent fires from lithium-ion and other batteries, keep in original packaging. Tape battery terminals and/or place batteries in separate plastic bags when storing or transporting

NON-ALKALINE/LEAD ACID AND ALL OTHER BATTERIES:

Bring to Andover's annual electronics collection or use private disposal

No regular curbside or drop-off available in Andover for Lead Acid Batteries of any size, or for any large rechargeable batteries (for laptops, tools, etc.) Please bring to Andover's Annual Electronics Collection (see Andoverma.gov/CRT for more information and date) or **bring back to participating retailers/manufacturers.**
